Description

Senior IT Business Analyst/ IT Project Lead – MANUFACTURING SITE

PERKS:

- Join a company that has been growing 25% YOY for 6 straight years!
- 401(k) match
- Great Health, Vision and Dental Coverage
- Life, Auto and Home Insurance
- Strong PTO program
- Identity Theft Protection

The Senior IT Analyst is an IT Project Leader responsible for partnering with the manufacturing site business teams and IT support teams to identify solutions that address business opportunities/problems while ensuring the existing solutions continue to meet the daily operational needs. The Senior IT Analyst/ Project Lead will report to an off-site IT Manager and report on-site to a local Plant Manager. This hands-on role will engage with end-users, business leaders, manage outside vendors, work with IT infrastructure teams, and IT application teams to understand opportunities and problems, and work with the appropriate parties to define, design, build and implement solutions. Examples of Projects this IT Role will lead include: Improving the ERP System Performance, Using VB or SQL to deliver new KPI data from the onsite ERP system, delivering data from CNC machines, troubleshooting software and upgrading servers.

Senior IT Analyst / IT Project Lead Responsibilities:

- Manage priorities and business expectations for all IT-related projects, enhancements, and production support requests
- Manage the production support activities, including holding support teams (internal and vendors) accountable for their production support responsibilities
- Work directly with program management and project managers to ensure on-time and on-budget delivery of projects and enhancements
- Manage smaller projects where appropriate
- Lead troubleshooting and resolution of IT issues or failures
- Manage and build new reports within the existing reporting and data analytics tools
- Ensure data storage and retention is maintained in accordance with the existing company policies
- Implement best practice quality assurance processes that ensure infrastructure and application solutions effectively address business requirements and comply with applicable enterprise IT policies and standards
- Work as a liaison among stakeholders to elicit, analyze, communicate, and validate requirements for changes to business processes, policies, and information systems

Hiring organization

Apple & Associates

Date posted

March 24, 2023
